

MANAGED INTERNET SERVICES

- Internet Bandwidth
- Circuit & Circuit Management
- Device Management
- Web Hosting
- E-Mail Transit Services
- Mailbox Services

Frustrated with slow Internet access speeds? Running mission-critical applications over the Internet? Point to Point Access.com goes beyond dedicated, secure Internet access with a portfolio of managed services, including security and intrusion detection . . .

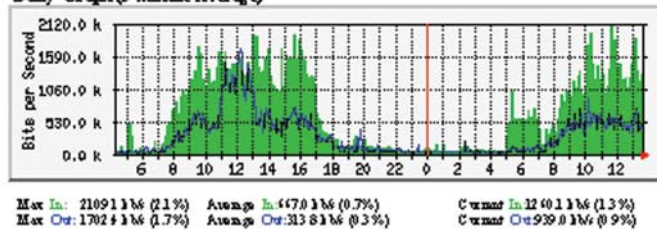

PORTFOLIO

HIGH SPEED INTERNET ACCESS &

Welcome to Point to Point Access.com (P2PA), the business Internet Service Provider. P2PA was established in 2000 to serve businesses that required secure, reliable high-speed Internet access. From a single rack in a co-location facility, P2PA has expanded into a full-fledged ISP with a sophisticated data center staffed by Internet security professionals. The company continues to evolve and innovate as new Internet uses and technologies emerge.

The P2PA Portfolio of products is focused on business class Internet services that address your foremost concerns: speed, reliability and security.

Daily Graph (5 Minute Average)

ONLY PAY FOR THE BANDWIDTH YOU NEED:
With Bandwidth Utilization Reports, you can see weekly, monthly and annual utilization data - so you know how much bandwidth you really need! These reports are included with every level of P2P Portfolio Services.

WE CONNECT YOU TO THE INTERNET . . .

Circuit, Bandwidth and Circuit Management

We connect you to the Internet by a secure, dedicated point-to-point circuit. Choose from a range of access speeds (from 384K to 45MB), and add bandwidth whenever you need it. We manage your circuit by providing up/down notification, utilization reports and repair coordination. Further circuit management options include sophisticated Intrusion Detection and Blocking.

WE MANAGE YOUR NETWORK 24/7 . . .

Device Management

From router and firewall configuration to continuous monitoring of your mail, web and DNS servers, we can manage all your network devices. With our staff and equipment managing your devices 24/7, you have the security of knowing you will be informed as soon as possible whenever there is an issue.

. . . AND WE EVEN DELIVER YOUR MAIL!

Web Hosting and E-Mail Services

Web Hosting and E-Mail Services complete the P2P Portfolio. With Internet access through Point to Point, we will host your site on our industry standard servers. If you have an e-mail server, we can provide E-Mail Transit and backup with all levels of service, or you can choose to purchase individual mailboxes on our servers.

COMPREHENSIVE NETWORK MANAGEMENT SERVICES

CREATE A PLAN AS INDIVIDUAL AS YOUR BUSINESS!

3 Levels of Service plus à la Carte!

Because every business has different needs, we will tailor a plan to your specific requirements. You can choose from 3 levels of service: Standard, Advanced or Premium. Customize your plan by adding services on an à la carte basis!
